INDUSTRIAL DECISION INTELLIGENCE

Don't predict the breakdown.

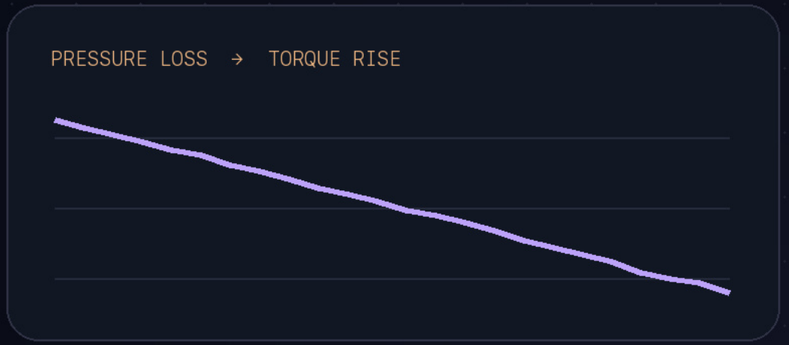

Change the outcome.

Challenge the cause. Compare the options.
Keep the operator in control.

FOR THE LINE SUPERVISOR UNDER PRODUCTION PRESSURE

The alarm is not the explanation.

UPSTREAM POSSIBILITY

€18.50

Pneumatic seal / verify before repair

DOWNSTREAM ALARM

€2,450

Robot motor / do not assume replacement

ILLUSTRATIVE PART PRICES. THE APP MUST EARN THE REPAIR RECOMMENDATION WITH EVIDENCE.

ACTIVE DIAGNOSIS / REDUCE UNCERTAINTY BEFORE SPENDING

One observation. A different decision.

0.624 bits Modeled information gain chooses the next useful observation—not a more confident story.

SUPPORT SCORES ARE DECLARED WEIGHTS, NOT CALIBRATED PROBABILITIES. TEST RESULTS HERE ARE SYNTHETIC.

NOT A SCRIPTED ANSWER. A DECISION YOU CAN CHALLENGE.

Let the jury change the evidence.

01

No test result

Inspect first

Don't guess the repair.

02

Leak confirmed

Repair eligible

Only with parts and time.

03

Stock = zero

Block repair

Diagnosis is not recovery.

04

Unsafe readings

Escalate

The model cannot override.

€11,439

Lower modeled scenario cost

€13,036 conventional baseline vs €1,597 confirmed repair.
210 vs 30 minutes under explicit assumptions; figures rounded.

OPEN MODELS. DETERMINISTIC CONSTRAINTS. A HUMAN SIGNATURE.

Intelligence proposes. Policy constrains.

01 / EVIDENCE

CSV + reference text

Validated values. Exact source lines.

Evolus libraries + extraction

Source-matched fields feed planning.

02 / REASONING

AMD-hosted open model

Review hypotheses and cite evidence.

Local constraint solver

Stock, deadlines, safety, modeled cost.

03 / ACCOUNTABILITY

Named human review

No action without acknowledgement.

Evolus workflow request

Honest status. Persisted audit trail.

44/44 Reproducible synthetic decision-contract checks

- Live provider verification: pending

FROM A PRESENTATION TO A DECISION

Your evidence.
Your constraints.
Your next move.

A better question before a costly action.

Let's challenge the demo.

INTERACTIVE DEMO / 90 SECONDS

01

Choose the evidence

Eight adversarial cases—or upload a CSV.

02

Change one constraint

Confirm the test. Remove the part.

03

Make the final call

Inspect the sources. Review the action.

START IN THE EVIDENCE STUDIO
